Electronic Commerce 2018 -Efraim Turban 2017-10-12 This new Edition of Electronic Commerce is a complete update of the leading graduate level/advanced undergraduate level textbook on the subject. Electronic commerce (EC) describes the manner in which transactions take place over electronic networks, mostly the Internet. It is the process of electronically buying and selling goods, services, and information. Certain EC applications, such as buying and selling stocks and airline tickets online, are reaching maturity, some even exceeding non-Internet trades. However, EC is not just about buying and selling; it also is about electronically communicating, collaborating, and discovering information. It is about e-learning, e-government, social networks, and much more. EC is having an impact on a significant portion of the world, affecting businesses, professions, trade, and of course, people. The most important developments in EC since 2014 are the continuous phenomenal growth of social networks, especially Facebook , Linkedln and Instagram, and the trend toward conducting EC with mobile devices. Other major developments are the expansion of EC globally, especially in China where you can find the world's largest EC company. Much attention is lately being given to smart commerce and the use of AI-based analytics and big data to enhance the field. Finally, some emerging EC business models are changing industries (e.g., the shared economy models of Uber and Airbnb). The 2018 (9th) edition, brings forth the latest trends in e-commerce, including smart commerce, social commerce, social collaboration, shared economy, innovations, and mobility.

The State of the World's Children 2019 -United Nations 2019-10-15 This report examines nutrition, providing a fresh perspective on a rapidly evolving challenge. Despite progress in the past two decades, around 200 million under-fives suffer from undernutrition. Adding to this toll is rising obesity, which affects 38 million children. All these forms of malnutrition threaten children's development, while obesity is creating a lifelong legacy of disease. At the heart of this evolving challenge is a global shift towards modern diets that do not meet children's nutritional requirements. The report provides unique data and analysis of malnutrition in the 21st century and outlines recommendations to put children's needs at the heart of global and national food systems.

Anthropology and Economy -Stephen Gudeman 2016-01-05 Comparative and critical, Anthropology and Economy offers a uniquely cross-cultural view of economy. Using examples from market and non-market situations, the book shows how economies are built on five increasingly abstract spheres, from the house to community, commerce, finance, and meta-finance. Across these spheres, economy incorporates a tension between self-interested rationality and the mutuality of social relationships. Even when rational processes predominate, as in markets, economies rely on sociability and ritual to operate, whether as cronyism, pleas to divinities or the magical persuasions of advertising. Drawing on data and concepts from anthropology and economics, the book addresses wealth inequality, resource depletion, and environmental devastation especially in capitalism, providing an understanding of their persistence and ideas for controlling them. Given the recent financial crash, Gudeman offers a different understanding of the crisis and suggestions for achieving greater economic stability.
