The book presents a unique and in-depth analysis of various lubricant applications, focusing on the latest developments, technologies, and processes in the multi-billion dollar lubricant business. It provides chemists and engineers with a clear interdisciplinary introduction and guide to all major lubricant applications. The book is rich in detailed illustrations, focusing not only on the various products but also on specific application engineering aspects and sustainability.

**Strategies of Multinational Corporations and Social Relations**

The book is divided into four parts, each focusing on different aspects of multinational corporations and their strategies. The book covers various case studies of multinational corporations operating in different countries, providing insights into their strategies, operations, and challenges. The book also discusses the role of social relations in the success and failure of multinational corporations. The book is a valuable resource for students, researchers, and practitioners in the field of international business and corporate strategy.

**Biodiesel Plants and Biodiesel Production**

This book provides an in-depth understanding of the entire biodiesel production process, from the selection of feedstock to the final product. The book covers various aspects of biodiesel production, including feedstock selection, pretreatment, transesterification, and product characterization. The book also discusses the environmental and economic benefits of biodiesel, making it a valuable resource for students, researchers, and practitioners in the field of renewable energy.

**Clinical Emergency Radiology**

This book provides an overview of emergency radiology, covering various topics such as trauma, infectious diseases, and neoplasms. The book is designed for radiologists and medical practitioners, providing a comprehensive guide to emergency radiology. The book includes practical guidelines and case studies, making it a valuable resource for students, practitioners, and researchers in the field of emergency medicine.
