THE SCIENCE OF YOGA MUDRAS-K. Rangaraja Iyengar 2013-05-17 Yoga is flying across the shores of Bharatha all over the world like an eagle. The entire humanity needs yoga today. If going after Yoga to get rid of diseases is one dimension, using Yoga to make our body healthy so that we can enjoy material pleasures is the other dimension. This was not what those great Rshis who evolved Yoga had in mind. Yoga is another name for pure living. If man lives, being aware of the purpose for which he was created, what else can it be excepted in Yoga? Human body is a temple. In a larger sense, it is the dwelling place of gods. Whatever one finds in the world is present in the human body. We have 72,000 Nerves in the body, also we have 72,000 Nadies which are subtle channels and centres of energy. We get a detailed account of these in books on Hatayoga. In this background Mudras and Bandhas occupy a place of great significance. We have a considerably difficult

challenge to convert this Annamaya body into one, the object of which is Dharma Sadhana. Kalidasa has announced, "Shareeramadyam khalu dharma sadhanam". Our sages have said, "Manaeva manushyanam karanam bandha mokshayoho" Our mind is the cause of both Bandha and Moksha. In that case how can we make use of the techniques available to us to the best of our advantage? "Mudras" help us to keep our body and mind pure and chaste. They are tools to lead us to life fulfilment. When we activate the nerve and nadi centres in the body, they make the flow of energy smooth. Our body is a fantastic machine designed by the Creator. He has set in it a super computer called the 'Brain'. All the activities in our body are controlled by the Mind. The pressure exerted on certain key points in the body and in hands, energises the centres in the brain. We have come to know this truth as a result of experiments conducted in different parts of the world. Acupressure specialists assert that if we activate certain points in the legs, hands and ears, we can ward off a number of disorders of the body. In our ancient Tantra Marga we hear about "Khechari Mudra". During five thousand years after sage Vedavyasa, our ancestors have devised a number of ways to help man keep himself fit. They are simple and workable. We get a sea of information about Mudra Science in a number of books on Yoga shastra and Tantra Shastra. In a few of our epics also, we get references to these Mudras.

Hydraulics and Fluid Mechanics-Richard Silvester 2014-05-16 Hydraulics and Fluid Mechanics is a collection of papers from the Proceedings of the First Australian Conference held at the University of Western Australia on December 6-13, 1962 at Nedlands, Australia. This book deals with the science of hydraulics and fluid mechanics in their practical uses in industry and research. In special situations when high-pressure oil is used in mechanical equipment, hydraulic lock is preferred for valve control. This book reviews the pressure drop in the pneumatic transfer of granular solids in a pipe where a formula is derived to determine the pressure drop when using either a straight or bent pipe. This text also discusses the improvements on the cavitation performance of flow pumps by using prerotation at design points. The construction of a dam in Tasmania provides another study on the behavior of rock-fill slopes subjected to seepage. Here, the book analyzes the hydraulic forces acting on the rock particles, and explains theories on the derivation of the dynamic equation for spatially varied flow with increasing discharge on a steep slope. The book also examines the concept of critical depth in spatially varied flow with increasing discharge on a steep slope. This book investigates the use of a computer model designed to determine the methods of draining flooded farmlands either through hydraulically or electrically operated drainage systems. This text also evaluates the cost of constructing a project. This collection is suitable for people in the field of applied mathematics, physics, and engineering.
