### **Designing with Conifers-**

Richard L. Bitner 2011-04-21 With blue, green, and gold foliage and shapes ranging from spiky to weeping, conifers have the potential to be garden design stars. But they are commonly misused in gardens and landscapes, leading to looming spruces squashed against a house or rows of kettledrum-shaped yews along a sidewalk. When used correctly and creatively, conifers can be star players in creating beautiful, long-lasting plant combinations or serene backyard havens. Designing with Conifers

shows readers exactly how to choose the best conifers for specific needs. Chapters cover shape, color, and conifers for specific sites and conditions, including front gardens, hedges and screens, topiary, dwarf conifers, shade gardens, Asian-style gardens, bonsai, and miniature railroad gardens. Also includes useful appendices that list of conifers for various problems and conditions, like conifers for areas plagued by deer and the best conifers for Christmas trees and Southern gardens. Each section is enlivened with gorgeous color photographs. Whatever landscape situation or challenge a gardener designer faces, Designing with Conifers shows how to make the best choice from this beautiful, useful, and versatile group of plants.

### **Organizational Simulation-**

William B. Rouse 2005-07-22 From modeling and simulation to games and entertainment With contributions from leaders in systems and organizational modeling, behavioral and social sciences, computing and visualization, and gaming and entertainment, Organizational Simulation both articulates the grand

vision of immersive environments and shows, in detail, how to realize it. This book offers unparalleled insight into the cutting edge of the field, since it was written by those who actually researched, designed, developed, deployed, marketed, sold, and critiqued today's best organizational simulations. The coverage is divided into four sections: \* Introduction outlines the need for organizational simulation to support strategic thinking, design of unprecedented systems, and organizational learning, including the functionality and technology required to enable this support \* Behaviors covers the state of knowledge of individual, group, and team behaviors and performance, how performance can best be supported, how performance is affected by national differences, and how organizational performance can best be measured \* Modeling describes the latest approaches to modeling and simulating people, groups, teams, and organizations, as well as narrative contexts and organizational environments

within which these entities act, drawing from a rich set of modeling methods and tools \* Simulations and Games illustrates a wide range of fields: simulations, games, and entertainment, including the methods and tools employed for designing, developing, deploying, and evaluating these systems, as well as the social implications for the associated communities that have emerged Addressing all levels of organizational simulation architecture with theories and applications, and enabling technologies for each, Organizational Simulation offers students and professionals the premier reference and practical toolbox for this dynamic field.

### **Algorithms and Protocols for Wireless and Mobile Ad Hoc Networks**

Azzedine Boukerche 2008-11-03 Learn the fundamental algorithms and protocols for wireless and mobile ad hoc networks Advances in wireless networking and mobile communication technologies, coupled with the proliferation of portable computers, have

led to development efforts for wireless and mobile ad hoc networks. This book focuses on several aspects of wireless ad hoc networks, particularly algorithmic methods and distributed computing with mobility and computation capabilities. It covers everything readers need to build a foundation for the design of future mobile ad hoc networks: Establishing an efficient communication infrastructure Robustness control for network-wide broadcast The taxonomy of routing algorithms Adaptive backbone multicast routing The effect of inference on routing Routing protocols in intermittently connected mobile ad hoc networks and delay tolerant networks Transport layer protocols ACK-thinning techniques for TCP in MANETs Power control protocols Power saving in solar powered WLAN mesh networks Reputation and trust-based systems Vehicular ad hoc networks Cluster interconnection in 802.15.4 beacon enabled networks The book is complemented with a set of exercises that challenge readers to test their

understanding of the material. Algorithms and Protocols for Wireless and Mobile Ad Hoc Networks is appropriate as a self-study guide for electrical engineers, computer engineers, network engineers, and computer science specialists. It also serves as a valuable supplemental textbook in computer science, electrical engineering, and network engineering courses at the advanced undergraduate and graduate levels.

### **Internet for Nursing**

**Research-**Joyce J. Fitzpatrick

2004-09-20 This book is a resource for using the internet as a tool in all aspects of nursing research--conducting it, teaching it, and using it. Experienced researchers describe internet-based research methods, information on online methods for teaching research, and accessing the

research of others. The appendixes include samples of existing research projects that use internet-based methodologies, as well as a listing of online resources for researchers.

**Kissing Architecture**-Sylvia Lavin 2011-05-09

Architecture's growing intimacy with new types of art  
Kissing Architecture explores the mutual attraction between architecture and other forms of contemporary art. In this fresh, insightful, and beautifully illustrated book, renowned architectural critic and scholar Sylvia Lavin develops the concept of "kissing" to describe the growing intimacy between architecture and new types of art—particularly multimedia installations that take place in and on the surfaces of buildings—and to capture the sensual charge that is being designed and built into architectural surfaces and interior spaces today. Initiating readers into the guilty pleasures of architecture that abandons the narrow focus on function, Lavin looks at recent work by

Pipilotti Rist, Doug Aitken, the firm Diller Scofidio + Renfro, and others who choose instead to embrace the viewer in powerful affects and visual and sensory atmospheres. Kissing Architecture is the first book in a cutting-edge new series of short, focused arguments written by leading critics, historians, theorists, and practitioners from the world of urban development and contemporary architecture and design. These books are intended to spark vigorous debate. They stake out the positions that will help shape the architecture and urbanism of tomorrow. Addressing one of the most spectacular and significant developments in the current cultural scene, Kissing Architecture is an entertainingly irreverent and disarmingly incisive book that offers an entirely new way of seeing--and experiencing--architecture in the age after representation.

**A World of Hurt**-Steve Niles 2011-07-19 An original and compelling work of dark fiction—and the first stand-alone novel—from Steve

Niles, the critically acclaimed creator of 30 Days of Night. Detective John Haven is an LA cop who lives by two rules; nice guys finish last, and honest people solve nothing. It was a hard lesson for him to learn, but once he allowed himself to swim with the sharks and take some questionable pick-up work on the side, he began to assemble a rock solid arrest and conviction rate...always walking a careful line between lawlessness and honor, but finding all too often, despite his heart, that his own anger is his worst enemy. Detective Haven deals with the harsh reality of the streets on a daily basis...but on the night of December 5, 2011, he steps into a crime scene like no other, and his world will never be the same. Haven's underworld network knows nothing. In fact, some are unusually silent, as if something has come to LA that frightens even the most hardened criminals and killers....

**Manual of Psychosocial Rehabilitation**-Robert King  
2012-08-06 Psychosocial Rehabilitation is a comprehensive ready-reference for mental health practitioners and students, providing practical advice on the full range of interventions for psychosocial rehabilitation. It contextualises the

interventions described and provides pointers to enable the reader to explore the theory and research. This manual recognises the wide-ranging impact of mental illness and its ramifications on daily life, and promotes a recovery model of psychosocial rehabilitation and aims to empower clinicians to engage their clients in tailored rehabilitation plans. The book is divided into five key sections. Section 1 looks at assessment covering tools available in the public domain, instruments, scoring systems, norms and applications for diagnosis and measurement of symptoms, cognitive functioning, impairment and recovery. Section 2 covers the full range of therapeutic interventions and offers advice on training and supervision requirements and evaluation of process, impact and outcome. Section 3 provides manuals and programs for interventions effectively provided as group activities. Section 4 explains how to design a full programme that integrates therapeutic interventions with

group programmes as well as services provided by other agencies. The final section looks at peer support and self help, providing manuals and resources that support programmes and interventions not requiring professional or practitioner direction.

### **Immunobiology of Organ Transplantation**

David S. Wilkes 2012-12-06 Currently, individuals interested in seeking an in-depth discussion of transplantation immunology must seek individual articles published in several journals, or extrapolate information from various non-transplant immunology textbooks. The purpose of this text is to provide the reader with a single source of information for the basic science of immunobiology of organ transplantation. It is unique that it focuses on immunobiology from the basic research side, with an emphasis on the cellular and molecular levels. The readers will be physicians, scientists, and graduate students interested and engaged in the

study of immunology as it relates to allo- and xenotransplantation. This book is designed to be the reference standard for the immunobiology of transplantation.

### **Inelastic Analysis of Solids and Structures**

M. Kojic

2005-07-28 Inelastic Analysis of Solids and Structures

presents in a unified manner the physical and theoretical background of inelastic material models and computational methods, and illustrates the behavior of the models in typical engineering conditions. The book describes experimental observations and principles of mechanics, and efficient computational algorithms for stress calculations as typically performed in finite element analysis. The theoretical background is given to an extent necessary to describe the commonly employed material models in metal isotropic and orthotropic plasticity, thermoplasticity and viscoplasticity, and the plasticity of geological materials. The computational algorithms are developed in a unified manner with some detailed derivations of the

algorithmic relations. Many solved examples are presented, which are designed to give insight into the material behavior in various engineering conditions, and to demonstrate the application of the computational algorithms.

**Thanks, Obama**-David Litt 2017-09-19 "Litt is a funny and skillful storyteller... While the first half of the book is enjoyable, the second half is masterly, rising to a crescendo that is as rousing as, well, a particularly inspiring campaign speech." — New York Times Book Review "Graceful, instructive, wry speechwriter memoirs like Litt's are the exception rather than the norm. . . . Thanks, Obama will join the ranks of lasting works about the texture of political life, and of coming-of-age accounts by staffers who grow up personally and politically at

the same time.” — The Atlantic “His time [in the White House] was as ‘hokey changey’ as advertised—with a little bit of absurdity and humor added into the mix.” — Elle, Best of the Month “Serve[s] as a more devastating indictment of the current administration than a campaign-style book ever could . . . limber, funny and illuminating.” — New Republic “Highly entertaining . . . much more than a scrapbook of Beltway gossip and Obama idolatry.” — Pacific Standard “Irresistibly charming . . . Litt minted his star converting world affairs into jokes. The translation of satire back to sincerity is trickier to pull off, and lands with its own undeniable grace.” — Slate “Litt is a skilled storyteller with a keen sense of humor and unique experiences and insight to draw upon.” — Bustle “Litt also offers both humor and optimism, two things many of us sorely need these days.” — Bustle, Best of the Month “What Litt understands and what Thanks, Obama makes clear may very soon be forgotten: The finest presidential speeches can

heal the nation.” — Paste Magazine “A thoughtful and funny account of life as a minnow surrounded by Washington’s self-important whales . . . ranks with other classics from former White House speechwriters, such as Peggy Noonan’s What I Saw at the Revolution.” — USA Today, \*\*\* 1/2 “Funny and unexpectedly moving . . . a powerful reminder that true fulfillment can come from wielding even the smallest bit of influence on behalf of those who have none.” — Washington Monthly “A fast, funny ride through the halls of power.” — Kirkus “Veering between tragedy and comedy, between self-doubt and hubris, Litt vividly recreates a period during which he saw his words sometimes become the words of a nation.” — Publishers Weekly “By turns moving and hilarious, David Litt’s rollicking account of his journey from campaign field grunt to presidential speechwriter is an irresistible read.” — David Axelrod, former Senior Advisor to Barack Obama and author of Believer: My Forty Years in Politics “David Litt has done the impossible: written a

smart, insightful, and funny White House memoir you don't have to be a political junkie to love. Even better, he takes us back to a saner more compassionate time when our president liked to read." — Judd Apatow "Terrific—part first-hand story about being inspired by a cultural icon, part how-to manual for getting involved in politics and making change. Thanks, Obama is a hysterical, pithy, and heartfelt trip down memory lane. And boy, do we need it." — Keegan-Michael Key "David Litt is brilliant. I've gotten to witness firsthand some of the work he did for President Obama at past White House Correspondents Dinners and it's always intelligent, razor sharp and hilarious." — Billy Eichner "An outstanding, hilarious, and precise memoir . . . I laughed again and again. This is an excellent account of what it felt like to work for the Second to Last President of The United States." — John Mulaney, co-creator and star of Oh, Hello "Don't be fooled by the self-deprecating narrator, this portrait of a young speechwriter is filled with wit, wisdom, and a loving

touch. David's labors remind of us a not-so-distant past when words mattered. If I was a simpleton and a book critic, I'd say thumbs up." — Matt Walsh, HBO's Veep "David Litt is a natural storyteller and an absolute joy." — Tig Notaro, author of I'm Just a Person "Thanks, Obama is a wonderful book for the same reasons David Litt's speeches for the White House were wonderful: it's well-written, it's funny, it tells us exactly what we're curious about, and. . . it reminds us that a great president galvanizes not only his staff but his country." — Anne Fadiman, author of Ex Libris "Funny and warm, David Litt knows how to make people laugh regardless of their political affiliation." — Mike Birbiglia, author of Sleepwalk With Me: And Other Painfully True Stories "A magnificent memoir on the Obama presidency. You'll walk away with another kind of hope that's needed now more than ever: the belief that a government can actually do some good." — Adam Grant, author of Originals and coauthor of Option B "A talented (and very funny) speechwriter, David will make

you laugh. He'll make you miss Obama more than you do already. Most of all, he'll renew your faith in the politics of hope." — Stephanie Cutter, former deputy campaign manager for Barack Obama
