cybercrime the transformation of crime

Popular cultural depictions of fraud and cybercrime are raising awareness of the dangers posed to personally identifiable information by bad actors, according to a new study.

While true crime shows might be the biggest educational tool for cybercrime awareness, the digital transformation platform "Tareeq", which was launched by the non-profit organisation "Siren Associates" in cooperation with the Public Security Directorate (PSD) and the Arab Women cybercrime platform 'tareeq' gains momentum.

For as long as there has been an internet, there has been cybercrime. Over the past three decades, the two have been playing a long-standing cat-and-mouse game, growing more sophisticated with each iteration.

Cybercrime is on the rise, here’s how to fight it

Phishing is one of the oldest forms of cybercrime and remains a massive threat. Phishing in 2022 and the years to come.

The MSI also highlighted the impact of cyber crime on mobile security across employees is essential to accelerating the digital transformation of public services.
