trick questions (with answers!) that will completely bend your mind
Phonetics is a fundamental building block not just in linguistics but also in fields such as communication disorders. However, introductions to phonetics can often assume a background in linguistics,

phonetics and speech science

why is phonetics studied?
Phonetics is all about studying the sounds we make when we talk. There are three main branches of this discipline: This is the study of the sound waves made by the human vocal organs for communication

what do phoneticians study?
These four sounds are missing from some of the seven words you can never say on television, and the pattern prevails in other languages too, researchers say.

curse words around the world have something in common (we swear)
